

Your Guide to **FERTILIZING**

We're quick to give our plants the water they need. But so many of us forget we need to feed them, too. Keep your plants looking like the day you brought them home (*or better*) with a little well-timed nutrition.

The basics

ACID-LOVING PLANTS

Fertilome Iron Plus once in spring and once in fall.

ACID-LOVING PLANTS

like boxwood, holly, Japanese maple, magnolias, dogwoods & spruces.

DECIDUOUS TREES & SHRUBS

Organic Elements or 12-12-12 in early spring, again later in spring and fall.

PERENNIALS

Organic Elements or 12-12-12 in early spring and again 6 weeks later.

ANNUALS

Jack's Classicote slow-release fertilizer when planting. Then Jack's Petunia FeEd or Bloom Booster water-soluble fertilizer every 2 weeks.

Always follow package instructions. And remember, you can also stop in, call us at 317-733-GROW (4769) or use online chat if you have questions or need encouragement.
