

Your Guide to PLANTING

Anyone can plant, and we hope you do! Whether you're planting yourself or you want us to handle everything for you, we're here for you with friendly advice and answers.

The basics

WHEN. Spring and fall for moderate temps and ample moisture.

DIG IN. Create a hole twice the width of the root ball and deep enough to cover all but the top 2-3 inches of the root ball.

SUPPORT. Sprinkle in Elements (like a power shake for roots), then amend soil with Altum's Soil Amendment (1:1 ratio).

PLANT. Remove plants from plastic containers (bring them back and we'll recycle!) and gently loosen roots. Backfill around the root mass with amended soil, mounding to the top of the root ball. Gently tamp down to eliminate air pockets and water generously.

MULCH. Add 2-3 inches of Altum's hardwood mulch (without packing tightly).

**SOUND LIKE TOO MUCH WORK?
ASK US TO DELIVER AND PLANT FOR YOU:**

NO-WORRIES 3-YEAR WARRANTY. An unprecedented three-year warranty with one-time replacement on every tree, shrub and perennial we plant for you.

LOCAL DELIVERY + INSTALLATION. Please ask about our local delivery area and delivery and planting rates or visit altums.com/planting-services/delivery-planting/ for details.

OR TRY OUR DIY SNAPSHOT OR DO IT FOR ME SERVICES. Get ideas, instructions and a quick sketch to do it yourself, or have us design, manage and install everything for you. Ask us for details or find out more at altums.com.
